INFORMAZIONI IMPORTANTI

Rialto è una linea in gres porcellanato prodotto con metodi industriali ma che presenta caratteristiche estetiche di una piastrella craquelé fatta a mano. Tutti gli smalti craquelé devono essere protetti con un sigillante applicato prima e dopo lo stucco, in particolar modo nelle zone che rimangono umide. Questo procedimento dovrebbe essere ripetuto a distanza di 6 mesi ma non apporterà nessun cambiamento alla superficie della piastrella. Si prega di notare che le piastrelle sulle quali non è stato applicato il sigillante potrebbero macchiarsi.

IMPORTANT INFORMATION ABOUT YOUR TILE

Rialto is a gres porcelain ceramic tile made in an industrial production way but presents the aesthetic characteristics of a handcrafted ceramic tile. All cracklé glazes must be sealed with a penetrating sealer prior to grouting, as well as after grouting, particularly in wet areas. This process should be repeated in 6 months, but does not affect the look of the tile surface. Please note that unsealed tile will stain.
